

# FRH SERIES

FRH-A24 - 24 Position 280 Terminal Fuse and Relay Holder

**The GEP FRH 24-Way Series is a high-density sealed 24-position fuse and relay housing with IP67/IP69K protection.**

It doubles the circuit capacity of the FRH 12-Way in the same sealed architecture. Ideal for powersports, outdoor power equipment, and heavy-duty vehicle applications requiring expanded fuse and relay management.

## KEY FEATURES

- (24) Four 280 terminal positions to support all 280 terminal componentry
- Unique cover mount design for easy access to housing componentry
- The compact size of the FRH Series PDMs makes it easy to package and integrate.
- Harsh environment handling: With an IP67 and IP69K rating, the FRH Series PDM is designed to withstand harsh environments and provide superior sealing performance.
- Vented cover available
- Various mounting brackets available
- Cover lock and TPA accessory available

GEP is a leading manufacturer of DC power distribution products. With a core focus on designing and developing innovative custom and standard products for the off-road, heavy-duty vehicle, and outdoor power equipment industries, GEP has a power distribution solution for your application.
